Testimonials from 2019

I believe this course was extremely important and made the possibility of systems change feel achievable. It is easy to become overwhelmed. I am truly in awe of the effort and achievement of the course organizers, and I thank them for creating a remarkable integration of the many layers that make up our existence as humans in the community on this earth. Thank you.

This course exposed me to many different ideas that I had not met before. It has changed the way that I look at and evaluate issues. I have gone even further away from conventional thinking and ideas.

I shared articles and case examples/websites with colleagues.... The material was solid! It added new information and helped me make sense of it all. It was clear and compelling. I agree with folks who talked about the huge value it has!!!

Having access to a pool of ideas is essential for all of us to exercise our imaginations. I will definitely recommend the resource to others, very useful for getting a group of people on the same wavelength to create further work.

This course was extremely important and made the possibility of system change feel achievable. I am truly in awe of the effort and achievement of the course organizers.

After the course, my activism took a new dimension. I had things moving with less effort.
